

Contractor Prequalification Requirements for
SPANISH FORK SANTAQUIN PIPELINE, continued

CENTRAL UTAH WATER CONSERVANCY DISTRICT

November 3, 2020

**CONTRACTOR SUPPLEMENTAL
PREQUALIFICATION REQUIREMENTS**

SPANISH FORK SANTAQUIN PIPELINE
Utah County, Utah

Utah Lake Drainage Basin Water Delivery System

CONTRACTOR SUPPLEMENTAL PREQUALIFICATION REQUIREMENTS

For the

SPANISH FORK SANTAQUIN PIPELINE

General

The Spanish Fork Santaquin Pipeline is an approximately 17.5 mile pipeline with approximately seven reaches and subreaches. In November, 2016 public notice was given and five contractors were prequalified to bid as prime contractors for the reaches and subreaches of the Spanish Fork Santaquin Pipeline. Four reaches, the Spanish Fork Reach, the South Fields Reach 1, the Salem Reach 2 and the Payson Spring Lake Reach have been bid and awarded for construction. These reaches total about 8.5 miles of the total 17.5 miles of the Spanish Fork Santaquin Pipeline, resulting in about 9 miles remaining to be bid. Nearly 4 years have elapsed since the time of the initial prequalification. The Central Utah Water Conservancy District is conducting a second round of prequalification to give opportunity for additional contractors to prequalify for the remaining construction reaches.

This packet is to prequalify additional interested contractors for the remaining reaches of the Spanish Fork Santaquin Pipeline which will include welded steel pipe up to 60 inches in diameter, cement lined with tape and mortar coating, flow control structures, water delivery turnout connections to secondary systems of cities in south Utah County, crossings of State highways, street excavation and restoration, utility relocations, and appurtenant pipeline facilities. The next reach of the Spanish Fork Santaquin Pipeline is expected to be bid in the spring of 2021.

This document describes the requirements for supplemental prequalification of contractors. The submittal requirements for prequalification statement and the evaluation criteria are included. Contractors who prequalified in 2016 are not required to

Contractor Prequalification Requirements for SPANISH FORK SANTAQUIN PIPELINE, continued

prequalify a second time. These contractors continuing to be prequalified include Condie Construction, COP Construction, VanCon Construction, Whitaker Construction and W.W. Clyde Construction Co. Tunnel contractors were separately prequalified in 2016. Supplemental prequalification of tunnel contractors may be conducted separately from this solicitation.

Purpose

The purpose of the prequalification process is to select those contractors the District deems to be qualified and capable of completing the Project in conformance with the Contract Documents. Only those general contractors that are prequalified by the District will be allowed to submit a bid for this project.

Subcontractors (except tunneling subcontractors), trades, suppliers, and manufacturers will not require formal prequalification. However, the general contractors shall not accept quotes, proposals, or sub-bids from any subcontractors, suppliers, or manufacturers that are not qualified to provide the service or supplies proposed. General Contractors are encouraged to inform any prospective subcontractors, suppliers, or manufacturers about proper qualification procedures. Tunneling contractors used by the general contractor must be prequalified. A separate prequalification process for tunneling contractors was conducted resulting in the following prequalified tunnel subcontractors; BTC, Claude H. Nix Construction, Drill Tech, HDD Willco, and Iowa Trenchless.

Selection as a prequalified contractor does not imply District's acceptance or approval of the contractor's specific personnel, suppliers, manufacturers, equipment or methods, whether or not these items are described in the contractor's prequalification statement, nor does it ensure that the contractor's bid will be considered responsive or responsible.

Project Description

The Spanish Fork Santaquin Pipeline is being constructed by the Central Utah Water Conservancy District as part of the Utah Lake Drainage Basin Water Delivery System (ULS) of the Central Utah Project Completion Act (CUPCA). A map attached to this prequalification packet shows the alignment of the Spanish Fork Santaquin Pipeline that will pass through the cities of Spanish Fork, Salem, Payson and Santaquin. The map shows that the 17.5 mile long pipeline may be segregated into approximately six reaches known as the Spanish Fork Reach, the South Fields Reach, the Salem Reach, the Payson Reach, the Spring Lake Reach and the Santaquin Reach.

The construction work for the remaining portion of the Spanish Fork Santaquin Pipeline in general, consists of furnishing and installing approximately 9 miles of 60-inch steel pipeline, each with welded joints, mortar lining, and tape and mortar coating; approximately 5 miles of HDPE pipeline up to 48-inch in diameter, asphalt paving, earthwork and other appurtenances and related work.

Contractor Prequalification Requirements for
SPANISH FORK SANTAQUIN PIPELINE, continued

Submittal Procedure

Prequalification statements will be received at the following address, until 4:00 pm,
Wednesday, December 9, 2020.

Office of the Construction Manager
SPANISH FORK SANTAQUIN PIPELINE
Central Utah Water Conservancy District
1426 E 750 N, Suite 400
Orem, Utah 84097

Two (2) copies of the contractor's prequalification statement along with Attachments A and B and other required submittals shall be submitted together with a digital copy in pdf file format on an unencrypted USB flash drive. Electronic pdf files shall be organized similarly to the hard copy submittal and, wherever possible, shall be generated electronically directly from the native document software rather than scanned copies. Any prequalification statement failing to clearly present all the requested information or failing to be in the requested format may be considered nonresponsive and rejected.

Information contained in the prequalification statement will be considered confidential and reasonable precautions will be taken to protect the security of the documents. The prequalification statement will become and remain the property of the District.

In accordance with State Law, prequalification proposals are a public record and are subject to public review upon request. However, a contractor may request that any part of its proposal be designated a protected record and not available for public release by complying with Utah Law, 63G-2-309(1). To do this, contractors must provide the Owner with a written claim of business confidentiality and a concise statement of reasons supporting this claim. This information must be submitted together with the proposal to be considered.

The District reserves the right to request a contractor to clarify any part of his prequalification statement. Response to such requests must be made in writing and will become part of the prequalification statement. Unsolicited supplementary information and materials received after the deadline will not be considered in the evaluation.

Tentative Schedule – Spanish Fork Reach Project

The following is a preliminary schedule for the Spanish Fork Reach Pipeline and is subject to change:

Notice for Contractor Supplemental Prequalification:..... Tuesday, November 3, 2020
Prequalification Packets Available at www.CUWCD.com: Tuesday, November 3, 2020
Prequalification Packets Due to the District: 4:00 pm, Wednesday, December 9, 2020
Prequalified Contractors Notified:..... Tuesday, December 22, 2020
Bid Documents Available:..... TBD

Contractor Prequalification Requirements for
SPANISH FORK SANTAQUIN PIPELINE, continued

Content of Prequalification Statement

The prequalification statement shall include the information requested below. The organization of the prequalification statement shall generally follow the outline below:

1. Title page
2. Contractor Prequalification Statement
3. Personnel and Qualifications
4. Previous Project Experience
5. Financial Information
6. Safety Program

Title Page

The title page shall identify the document as a prequalification statement and shall include the name of the Owner, the name of the Project and the name of the contractor.

Contractor Questionnaire

The contractor shall complete and sign the attached Contractor Questionnaire and include it with the prequalification statement.

Personnel and Qualifications

Present information which will identify key personnel who will be assigned to the project, including project manager, project engineer, and project superintendents.

Describe the background and experience of each of these individuals. Provide detailed resumes for the project manager, project engineer, and project superintendent(s).

Describe the approach to scheduling and accomplishing the work. Identify which major trade work (i.e. structural, mechanical, electrical, earthwork) will be completed by the contractor's forces and which will be performed by subcontractors.

Previous Project Experience

1. Describe past experience showing satisfactory completion or progress on work of similar complexity and comparable in scope to that described with regard to both pipeline and valve vault construction. Demonstrate ten years recent experience in pipeline construction projects. Demonstrate ten years of recent experience and the completion of three similar construction projects using welded steel pipe at least 48 inches in diameter with cement mortar linings and dielectric coatings. Demonstrate experience with at least two flow control vaults completed in the last ten years with at least 75 cfs flow capacity and valves 24 inches or greater in diameter. Provide the following information: Project name, contract award date and completion date, Owner's name with contact and phone number, bid amount, final amount, number or change orders, prime contractor/subcontractor status and approximate amount of involvement, geologic conditions, pipeline type, length, diameter, and method of excavation and equipment used. (see Attachment A for

Contractor Prequalification Requirements for
SPANISH FORK SANTAQUIN PIPELINE, continued

suggested format and attach appropriate number of Attachment A forms, one for each project).

2. The proposed project manager assigned to the project should demonstrate at least ten (10) years of experience in the construction of welded steel pipelines. Submit the name and resume of the project manager who will be assigned to the project. The resume should provide a detailed experience summary including the following: the name of each project, description of project, position held, employer, responsibilities, and a reference and phone number of all pipeline construction assignments in the last five years. Submit the name, resume, and experience summary of an alternate project manager who will be assigned to the project in the event the proposed project manager becomes unavailable for this assignment. The alternate project manager must satisfy the above experience requirements. Submit similar information on the following individuals: Project Engineer (min. five years experience), and Pipeline Superintendent (min. five years experience). These individuals will be evaluated on the basis of technical experience, managerial experience, and education.
3. The contract documents will require the use of a slide rail shoring system for pipeline excavation. Please submit a detailed and thorough discussion of method(s) previously used for supporting pipeline trench excavations on past pipeline projects.
4. Present a detailed and thorough discussion of methods previously used for handling water infiltration during excavation, prior to and during installation of pipelines and concrete structures addressing (1) Water control during excavation; (2) Water control during pipe laying operations; and (3) Water control given a sudden increase in flow. Provide details on methods used on other projects for treating effluent from pipeline trench excavations to meet state water quality standards.
5. List any work awarded within the past ten years but not completed and the reasons for not completing the work.
6. Submit a bonding record or show proof of adequate bonding ability. Prospective bidders should demonstrate bonding ability for five consecutive years prior to submission of this prequalification statement. Indicate whether the contractor has been refused surety, bond, or liability insurance within the past ten (10) years and explain.

Financial Information

Submit a certified financial statement for the contractor's most recent accounting period. Submit a letter from contractor's surety company specifying contractor's total bonding capacity and current unused bonding capacity. Submit additional references and information sufficiently comprehensive to permit an appraisal of contractor's current financial condition.

Contractor Prequalification Requirements for
SPANISH FORK SANTAQUIN PIPELINE, continued

Listing of Contractor and Company Principals

Submit as part of the Prequalification Statement a listing of the contractor's name and Utah contractor's license number, together with a complete list of all company principals and addresses.

Safety Program

Submit a summary and describe the Contractors safety program and performance for the last 4 years. Include the Proposer's Experience Modification Rate (EMR) and the U.S. Occupational Safety and Health Administration (OSHA) reportable accident rate for the last 4 years, and the most recent OSHA Form 300.

Evaluation of Prequalification statements

Prequalification statements will be evaluated based on the following criteria:

- Personnel and qualifications
- Previous project experience
- Financial condition
- Safety Program

Qualified contractors must meet the following minimum criteria:

- Contractor shall hold a current contractor's license in the State of Utah in a classification appropriate to this Project.
- Contractor shall have \$25 million available bonding capacity.
- Contractor shall have significant experience in the construction of welded steel pipelines 48 inches and greater in diameter.
- Contractor's pipeline superintendent(s) shall have at least 5 years experience and shall have been superintendent on the construction of at least one large welded steel pipeline project.

Meeting the minimum criteria above does not automatically qualify the Contractor. The District will evaluate all proposals and reserves the right to select the most qualified Contractors. The District shall be entitled to contact each and every reference listed by the contractor. The contractor, by submitting a prequalification statement, expressly agrees that any information concerning the contractor in possession of said entities and references may be made available to the District.

Notification of Prequalified Contractors

All contractors submitting prequalification statements will be notified in writing if they did or did not prequalify. A brief explanation of reasons for not prequalifying will be provided to the unsuccessful contractors. Only contractors who are prequalified will be allowed to bid. **The District's decision will be final.**

CONTRACTOR QUESTIONNAIRE
SPANISH FORK SANTAQUIN PIPELINE

Complete the following information and submit this form with the prequalification statement.

1. Contractor's name: _____
2. Business address: _____
3. Phone number: _____ 4. Email: _____
4. Firm type: Corporation Partnership Individual Joint Venture
5. Number of years the organization has been in business as a contractor under present business name (10 year minimum required):
6. List the full names, titles and addresses of key individuals and/or officers of the firm:

7. Number of permanent office and support employees _____
Number of permanent field employees _____
8. How long has company been doing work similar to proposed project? _____
9. Contractor License(s).
List on a separate page: the status or trade categories in which your organization is legally qualified to do business, including applicable contractor license number, expiration date, state(s) in which licensed, name on license.
10. Contractor's Bonding Company (agent's name, address, telephone number):

Contractor Prequalification Requirements for
SPANISH FORK SANTAQUIN PIPELINE, continued

11. Contractor's Bank or Financial Institution (name, address, telephone number and contact-person):

12. Contractor's Insurance Company (agent's name, address, telephone number):

13. Has the contractor, or any of its parents or subsidiaries, ever had a bankruptcy petition filed in its name, voluntarily or involuntarily? _____
If yes, specify date, circumstances, resolution and other details on a separate page.
14. Are there any unresolved claims or disputes on any work awarded to the contractor during the past five years? _____
If yes, give owner's name and details on a separate page.
15. Has any officer or partner in the contractor's organization ever been an officer or partner of this or some other organization, that in any way undertook a construction contract that was not completed? _____ If yes, state the name of the individual, the project, the owner's name and reasons it was not completed, on a separate page.
16. Does the contractor maintain a permanent safety program? _____
If yes, attach a copy of the program. Submit the contractor's EMR and OSHA reportable accident rate for the last 4 years, and the most recent OSHA Form 300.
17. Does the contractor have a formal quality assurance program? _____
If yes, attach a copy of the program.
18. Is the contractor familiar with the National Environmental Policy Act? _____
19. Is the contractor or any of its principals presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in any program or project which is 100% or partially funded with federal funds?

Contractor Prequalification Requirements for
SPANISH FORK SANTAQUIN PIPELINE, continued

20. Has the Contractor ever performed work previously for the District? _____. If yes, list below the last three projects and approximate dates the work was performed.

<u>PROJECT</u>	<u>BID AMOUNT</u>	<u>FINAL AMOUNT</u>	<u>YEAR</u>

21. Have liquidated damages ever been levied against the Contractor for failing to complete any project on time? _____

I hereby warrant that the information presented in this prequalification statement is true; accurate and complete.
