

Diamond Fork System Environmental Update Project

How to Comment

Comments may be the most important contribution from citizens. Accordingly, comments should be clear, concise, and relevant to the analysis of the Proposed Action. Take the time to organize thoughts and edit the document submitted. Comments that are solution oriented and provide specific examples are helpful.

It also helps to be aware of what other types of issues the decisionmaker is considering in relationship to the proposed project. Commenting is not a form of “voting” on an alternative. The number of negative comments an agency receives does not prevent an action from moving forward. Numerous comments that repeat the same basic message of support or opposition will typically be responded to collectively. In addition, general comments that state an action will have “great environmental effects” will not help an agency make a better decision unless the relevant causes and environmental effects are explained.

Finally, remember that decisionmakers also receive other information and data such as operational and technical information related to implementing an action that will be considered when making a final decision.

Comment

The following comments, which identify my issues, concerns, and/or information, are provided for the U.S. Department of the Interior, CUPCA Office, the Central Utah Water Conservancy District, and the Utah Reclamation Mitigation and Conservation Commission to consider in the project planning process:

Name: _____ Phone: _____

Address: _____ Email: _____

Comments: _____

If you need more space, please feel free to attach additional sheets. **Comments must be received no later than Friday, April 24, 2020**

Central Utah Water Conservancy District
Attn: Sarah Sutherland
1426 E. 750 N. Ste. 400
Orem, Utah 84097-5474
